GENERATIVE AI FOR ALL (NO CODING)

Generative AI for All (No Coding)

Duration: 2 Months (Weekend Batch – 48 Hours)

Schedule: Saturday & Sunday, 3 hrs/day

Mode: Hybrid (Concepts + Tool Demos + Guided Projects)

Module 1: Introduction to Generative AI

Topics:

- What is AI, Machine Learning, and Generative AI
- Evolution from Chatbots to Agentic AI
- Real-world applications in education, business, and creativity
- Overview of ChatGPT, Gemini, Claude, and Groq

Hands-on:

- Try Groq Chat, Gemini, and ChatGPT for writing, learning, and productivity tasks

Module 2: Mastering Prompt Engineering

Topics:

- What makes a great prompt
- Role, tone, and context-based prompting
- Prompt templates for writing, teaching, and marketing
- Using few-shot and structured prompts

Hands-on:

- Create prompts for resume writing, lesson planning, and social media content

Module 3: AI Tools for Productivity & Creativity

Topics:

- AI for Office Work – Google Workspace, Microsoft Copilot
- AI for Design – Canva, Leonardo, Adobe Firefly
- AI for Video & Voice – Pika Labs, Synthesia, ElevenLabs
- AI for Business – Marketing, HR, Education, and Finance use cases

Hands-on Project:

- Create your personal AI-powered resume, video intro, and presentation

Module 4: Exploring Free & Open AI Tools

Topics:

- Understanding AI models (ChatGPT, Llama 3, Gemma – simplified explanation)
- What makes Groq special – free, fast, and open access
- Using Groq Playground – no-code interface for AI interaction
- Exploring Hugging Face Spaces – ready-made AI apps for public use
- Comparison: ChatGPT vs Groq vs Gemini (practical examples)

Hands-on:

- Chat with free Groq Llama 3 model
- Explore Hugging Face tools for text and image generation
- Compare outputs between different AI tools

Module 5: Real-World AI Applications

Topics:

- AI for Students, Teachers, Designers, and Entrepreneurs
- How to combine multiple AI tools to automate daily work
- Understanding AI Ethics, Bias, and Copyright
- Introduction to Agentic AI (preview of next course)

Capstone Project:

- Design an “AI Personal Assistant” workflow using free no-code tools

CAREER ORIENTED ADVANCED SKILL DEVELOPMENT PROGRAMS

Data Science & Analytics Training: Master tools like Python, R, SQL, and Machine Learning while gaining hands-on experience with real-world datasets. Learn to analyze data, build predictive models, and make data-driven decisions.

Artificial Intelligence Training: Dive into AI with neural networks, TensorFlow, PyTorch, NLP, and computer vision. Develop intelligent systems and AI-powered applications through practical, industry-relevant training.
